OPPORTUNITIES

Downloads reports, shares results and uses insights for decision making and policy improvement.

Download options, report generation, share insights, feedback / contact.

Use data-driven insights to support research, policies and sustainable development goals.

Useful insights that help in better decision making and planning.

Difficulty in interpreting results or applying them effectively.

Enable export of reports, policy recommendations and periodic updates.

Clicks on predict, views HDI score and explores interactive visualizations and insights.

Prediction dashboard, charts, graphs, feature importance, country comparison.

Understand HDI score, key factors and compare with other countries.

Accurate prediction with clear visualizations and meaningful insights.

Prediction errors due to poor quality data or outliers.

Add explanations, feature importance and what-if analysis.

Uploads dataset or enters country indicators related to education, health and income.

File upload, form input, data preview, data validation and preprocessing module.

Get accurate predictions using country specific socio-economic indicators.

Quick data upload and successful preprocessing with no errors.

Missing values, incorrect format or insufficient data.

Add automatic data validation, sample datasets and input guidelines.

Navigates to the system, creates an account / logs in to access the dashboard.

Web interface, login page, user dashboard, help documentation.

Access a simple and reliable tool for HDI prediction.

Clean, user-friendly interface and smooth login experience.

Login issues or confusing navigation.

Improve UI/UX and provide guest demo access.

Learns about the project through website, GitHub, demos, research papers or recommendations.

Project website, GitHub repository, social media, research articles, demo videos.

Understand HDI and how predictions can help in development planning.

Easy to understand project information and documentation.

Lack of awareness about HDI or project capabilities.

Increase outreach through tutorials, blogs, videos and case studies.
