1. Purpose of Document

The purpose of this document is to summarize the testing performed on the **HDI Prediction System** before the final release. It presents the test coverage, defect analysis, and overall testing status to ensure that the application meets the functional and performance requirements. The report confirms that the system is reliable, accurate, and ready for deployment.

2. Defect Analysis

This report summarizes the defects identified during testing, categorized by severity and resolution status. Most issues were resolved during development, and no critical defects remained at the time of release.
